

# THE AVMUG

Vol. 3 March, 2006

## Antelope Valley Micro-computer Users Group Newsletter MARCH 2006

### “HAPPY SAINT PATRICK’S DAY”

#### **\*\*NEXT GENERAL MEETING\*\***

This meeting will be held on the 15<sup>th</sup> of March. It will start at 7:15 P.M. Sharp.

#### **INSIDE THE MUG**

- Meeting notice
- Mynee & Moe Chatter Box
- Presidents Corner
- General information
- Computer tips
- Club Application

Your name for free raffle ticket

#### “Mynee & Moe’s Chatter Box”

Mynee: “Hey Moe !”

Moe: “What Mynee?”

Mynee: “This month we have a guest speaker from CCC Complete Computer Care by the name of Dan

Kozina, he is the owner and always has a great bunch of information to share with us.

Moe: Just, maybe you can learn something, heh heh.

Mynee: I’m sure all that attend will go away with something that they did not know.

**Moe:** Know what else he has his own Computer shop located at: 2330 Mall Loop Road, he is in # 110 Lancaster, Ca. (661) 729-2627 and Fax (661) 729-3638 Email is Compcare@Qnet.com.

**Mynee:** Yeah, Moe, I was in the Store last week and they have redone it. Lots of open space to look at all the goodies that us Computer Nuts like to drool over.

**Moe:** He has worked on my computer and his prices are very compatible with the market. Also the techs he has working for him are super and know what they are doing. That is a plus for any shop.

**Mynee:** That is for sure, Moe. Oh one other thing, Just in case you did not pay your dues like you said you were last month, You need to do it ASAP, Did you pay yours Moe?

**Moe:** Yes I sent it in to the Club.

**Mynee:** I heard that if you did not have your dues paid by the General meeting in APRIL, that they will not be sending you a newsletter any more

as you are not a member. Glad to see you are going to get yours.

**Moe:** Ok Mynee, Got to go: see you on Wednesday the 15<sup>th</sup> of March at the Senior Center, in Lancaster, CA.

---

The next months meeting on  
March 15<sup>th</sup> 2006

---

#### **PRESIDENT'S CORNER**

**Do you have questions about your computer, and things you should be doing etc:**

If so, join us on Wednesday February 15 for our first speaker of the year. DAN KOZINA. The owner of COMPLETE COMPUTER CARE, he will be giving out a lot off neat information. This should be of interest to all, new and old time computer users.

So, bring your questions, and maybe a friend or two and let's see if we can have some fun. See you there!

---

**Hi SCRUGS members, I thought I would forwarded this in case you didn't receive it.**

**Judy**

**Hi Judy,**

I want to let you know about the Desktop Linux Summit coming April 24 and 25 to San Diego, CA. There is a special User Group rate of only \$25 for both days. You can find all the details at:

<http://www.desktoplinuxsummit.com>

There will be two event tracks at the Desktop Linux Summit this year:

---

**Track 1: The Future of Desktop Linux**

---

This is the place to find out where desktop Linux is going and where the next big hit will be - emerging markets like China and Latin America,

public school systems, or large-scale corporate desktop deployments?

Topics include:

- \* Predictions for Desktop Linux: 2006
- \* The Open Document Debate
- \* International Expansion of Desktop Linux
- \* Linux in Education
- \* ODF in enterprise – will big companies bite?
- \* How will corporate America adopt Linux?
- \* GPL and Licensing
- \* What's holding desktop Linux back? Hardware and application gaps
- \* Linux evangelism - what you can do to fuel adoption
- \* Linux DRM - Will it happen?
- \* Why Should my Business Use OSS?

---

Track 2: Inside Desktop Linux

---

This session is for new and advanced users who want to make the most out of their Linux experience.

Topics include:

- \* Harnessing the Mozilla Platform
- \* Migration stories: Creating a Phased Plan for Mass Deployment
- \* Using desktop Linux in a mixed environment (SMB/Enterprise)
- \* Targeting the Linux Desktop with Qt and the LSB
- \* Newbie Series: Choosing a Linux distro and making the most of it
- \* Assessing Open Source Application Adoption
- \* Moving your Business to Linux: What your IT staff needs to know
- \* System Builder Session: Building Linux PCs – 3 45-minute sessions on how to build a Linux desktop
- \* OEM Special Session: How to make Linux profitable for you
- \* Builder Sessions: Building a Linux system

There will also be a Linux Installfest happening during the Summit and we are currently looking for volunteers. If you would like to help out

(and get free admission to the show)

please visit:

<http://www.desktoplinuxsummit.com/installfest>

Please post this on your event calendar and let your Members know:

What: Desktop Linux Summit 2006

When: April 24-25, 2006

Where: Manchester Grand Hyatt, Downtown San Diego, CA

Info: <http://desktoplinuxsummit.com>

Best regards,

Kendall Dawson

COMPUTER TIP # 1

**Do You Know the Menu Key?**

I made a new friend today. It was there all along and I never noticed it on the right side of my keyboard between the Window Key and the Control Key. I don't even know its name, so I call it the Menu Key. Why? Because when you press it, it opens up a drop down menu for

whatever program you're in. The menu includes all the information you would see if you right clicked, so I guess you could also call it the Right-Click Key.

So, next time you're typing away and need an edit menu or some other feature that you normally right-click to get, just head down to the Menu Key. Pretty soon it'll be your friend too. [Computer Info ...wonderful](#)

**“WELL I’LL BE” !!**

Dad gum thing WORKS!!!!!!

I just found this out and thought I'd pass this on. It's very useful when trying to read small print (especially in the early hours). If you hold down the Ctrl key on your key board and then turn the small wheel in the middle of your mouse away from you or towards you, the print size will change - it will either get larger or smaller - depending on which way you turn the wheel

Try it. ~

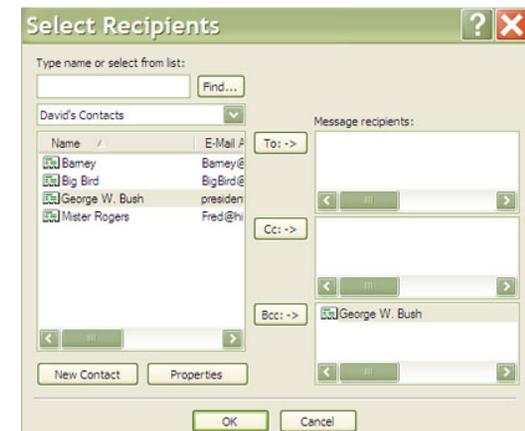

David (tips came from worldstarts Steves computer tips.

Have you ever gotten something forwarded to you with hundreds of e-mail addresses in the header? Every address on that e-mail may be getting unintentionally passed all over the net. When you forward it to everyone in your address book, you risk making every address on that e-mail vulnerable to unscrupulous advertisers.

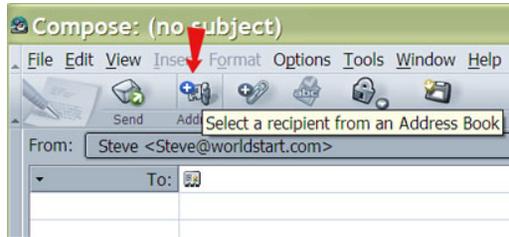

So, do your friends a favor and avoid exposing their addresses to all of cyberspace by sending mass mailings as Blind Carbon Copies (Bcc). E-mail privacy is just a few clicks away. Here's what you do.

When you create or forward an e-mail in Outlook Express, you usually click on "To:->" and make selections from your address book. If you look down, you'll see other options: "Cc:->" and "Bcc:->." Simply highlight the addresses you want to send to and click "Bcc:->."

When you finish your selections, click OK and you will return to the New Message window where you can type your e-mail. Put your own address in the "To:->" field.

If composing or forwarding an e-mail in Netscape mail, open your address book in the menu at the top (the icon looks like a plus sign on an index card with a little person standing next to it).

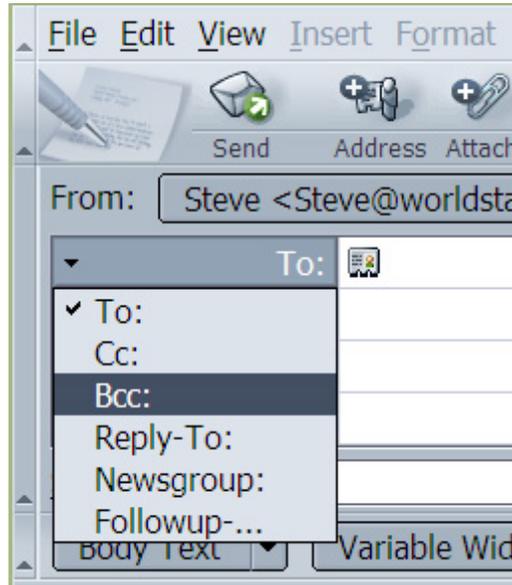

Then, select names from your address book and click "Bcc:->" to add the names to your list.

Click OK and you will return to the composition window where you can type your message.

You can also click the arrow in the "To:>" field, then Select "Bcc:>" and type in the addresses or copy (CTRL+C) and paste (CTRL+V) next to the index card

With AOL, you can just put the recipient addresses into the "Cc:>" field in (parenthesis) for them to be hidden.

Most other Web based e-mail clients have a Bcc option somewhere.

Put your own address, or a fake one, in the "To:->" field and everyone

who receives the e-mail will only see that address and not the other 275 people you sent the message to. You could leave that field blank, but keep in mind that some filters block e-mail with a blank "To" field.

## COMPUTER TIP # 2

**Q:**  
Is there any way I can use the same printer for two different computers? If so, it would be a lot easier than having to buy another printer.

**A:**  
There sure is! There's no need to waste your money on another printer. If you have more than one computer and only one printer, you can have the computers networked together to enable printer sharing on the computer with the printer. This is done under the Network icon in the Control Panel.

Then, install the networked printer you created above on the second

computer. You do this from the Printers folder in My Computer ( XP users, head to the Control Panel). Just click "Install Printer" and when asked, tell it you're installing a network printer. \*Bob Wade\* There's a handy little wizard to guide you through the process (it's actually very easy). That should get you printing.

The only potential problem I can see is if the printer is not able to be used on a network. Most can be, but there are some that will refuse to run.

Okay, but what if the computers aren't networked together?

If they're not networked, you still have an option. Most computer stores sell a switch box device that can be used to connect a single printer to several computers. Although this doesn't work every time (some printers are funny about switch boxes), most of the time it does the trick. You should be able to get these switch boxes for under \$30.00.

A word of caution: you may want to check your printer documentation to make sure that the switch box is safe for the printer in question. I've never really seen a problem with using a switch box, but it never hurts to check.

~ Steve ~
